

## **Poly Silicon Display**

This 7 in. WVGA 800 x RGB X 480 transfective TFT with white LED backlighting is fabricated with low temperature poly silicon and is fully RoHS compliant. The OSD070WGEA1 offers a high 500:1 contrast ratio, high color saturation, and wide viewing angles. The efficient LED backlight provides a uniform luminance of 500 cd/m<sup>2</sup>. The display supports extended operating temperatures from -20 to 70°C and storage temperature from -30 to 85°C.
