

Web-Based Health/Safety Training White Paper

A free white paper entitled “The Role of Web-based Health and Safety Training in Laboratory Facilities,” is available to help companies, institutions, and universities evaluate the efficacy of using web-based environmental health and safety (EH&S) training to meet their compliance requirements. Employee health and safety training is an essential part of meeting U.S. Environmental Protection Agency and Occupational Safety Health Administration compliance requirements. The white paper is authored by environmental health and safety engineers at EH&E, a leading provider of health & safety and engineering consulting solutions for critical environments. *Information:* www.eheinc.com/hstraining.htm [1].
