

Swivel Head VMC

Aimed at medical parts manufacturers, the FZ12KS Tilt vertical machining center incorporates a swivel head spindle for single setup machining of complex parts. It has a swiveling range of -10° to 115°, and it only takes 0.5 seconds to swivel from 0° to 90°. This machining center, coupled with the optional bar feeder, offers maximum versatility. Ideal applications for the FZ12KS Tilt include orthopedic devices, such as larger implants, bone plates, hip sockets, and surgical instruments made of special plastics, titanium, and steel.
