

Online Dimensional Drawings Capability

The Internet has become a daily tool box for many engineers to help them find, specify, and procure equipment. A myriad of sites offer a variety of functions associated with the specifying and purchasing process. However, RTD Co.'s site offers the capability to both specify and then instantly create a dimensional drawing. After the user's selections are made a "Drawing on the Fly" dimensional drawing is available in approximately five minutes. *Information:* www.rtdcompany.com [1].
