

## IT & Controls Engineering Paper

MTS Systems Corp. Sensors Division has introduced a comprehensive product catalog for liquid-level applications. The catalog features the high-performance M-Series products with Temponsonics magnetostrictive technology and a wide range of diagnostic, programming, and accessory options that make the liquid-level sensors ideal for tank gauging and process applications. *Information:* [www.mtssensors.com](http://www.mtssensors.com) [1].
