

Label Printer/Applicator (4215)

The PA1200s specialty tamp label printer/applicator features all metal construction and is made to last with time-tested components. It is extremely versatile with the ability to apply labels as small as 0.25 x 0.25 in. and up to 40 labels per minute. Suitable for small, delicate, high precision applications, the PA1200s is ideal for applying labels to electronic components, printed circuit boards, pharmaceutical and medical applications, plastic parts, assemblies and much more. The unit is automatic or semi-automatic and is easy to use, with minimal adjustments necessary for a quick setup.
