

## Conveyor/Pallet System

The X85 conveyor platform, X85 pallet system, line control, and Youtilize offers a complete automation package for manufacturers. The conveyor offers longest in class MTBF and lowest in class noise level. Substantial concern has been spent on trouble free operation and good factory environment. The distributed line control allows dynamic speed control, with soft starts and stops. The pallet system is a toolbox for single piece flow solutions enabling flexible routing, and full control of each product in process. Youtilize is an MES (manufacturing execution software) that manages all resources available in the production: operators, machines, and parts used; as well as all data and information needed for the production.
