

Electronics and Connectors Catalog

Advanced Interconnections Corp. offers a 144-page catalog featuring the company's latest standard products and custom capabilities. Catalog 16 is an easy-to-use tool for selecting surface mount or through-hole IC sockets, adapters, or connectors for a wide variety of test, validation, or production applications. Hundreds of configurations are shown, all available with RoHS compliant insulators and terminal plating options. In addition, the catalog features several useful reference sections including 18 pages of the industry's most reliable screw-machined terminals and over 1,000 BGA footprints. *Information: www.advanced.com.*
