## **3-Meter Chamber**

The company has added a fully-automated, state-of-the-art, semi anechoic 3-meter chamber to its Wheeling, IL testing facility. This chamber, listed with the FCC, allows for a streamlined measurement process, at frequencies that exceed 1.0 GHz. More products currently have clock/crystal frequencies >108 MHz, and the FCC requires these frequencies to be tested beyond the former 1.0 GHz limit.
