

Cleanroom Linear Robots

The Adept Python Cleanroom Class 1 ESD modular Cartesian robots are the latest addition to the industry's broadest cleanroom and ESD product line that includes SCARA, Six-axis, and Cartesian robots. The new robots are targeted at precision assembly and handling applications. They provide high speed and precision motion while maintaining very clean operation. The Python modules can be configured to fit a wide range of ESD sensitive product applications where speed, precision, and flexibility are required.
