

Digital Fluid Dispenser

The SL101 is a self-teach, RoHS compliant, CE mark, bench top dispenser with a bright LCD and 10 memory locations to automatically cycle 10 self-taught programs. Auto-cycling is one of three operation modes available. The other two are: Manual-Mode, enabling a dispense operation controlled by a foot-pedal and Timed-Mode that will dispense a pre-set time. Touch sensitive controls program the SL101 with dispense periods from 0.01 to 9999 seconds. Systems are available in 110 and 220 V versions. Air Input is 70 to 100 psi. Dispense output air pressure can be programmed from 1 to 100 psi.
