

## Test Connectors

Capable of sealing down to 0.015 inches OD, the ME001 connector is designed for leak testing infusion set and drug delivery devices. Its compact 0.84 inches OD easily mounts in limited space locations, and its pneumatic actuation is ideal for soft touch control of delicate components or automation for ergonomics or high production testing. Complementing the ME001 Series, the ME01 and ML001 connectors feature a maximum sealing capacity of 0.51 inches. Additional features include aluminum or stainless steel housings, FDA approved seals and lubricant, and replaceable size and seal materials. In addition, the connectors are chemically cleaned and double bagged for added protection.
