

# Injection Molding and Extrusion Grade Vinyl Compounds

The Geon HC product line will feature flexible injection molding and extrusion grade vinyl compounds with a wide range of durometers. These compounds are available from as low as 60 Shore A through nearly-rigid grades, and many have USP Class 6 and FDA regulatory status. The compounds can be gamma and EtO sterilized, and are available in quantities from as small as 50 pounds to larger quantities. Non-phthalate grades are available.
