

Thermistors Brochure

A new product profile presents an overview of the Epcos range of NTC thermistors for temperature measurement, inrush current limiting, and temperature compensation. This full-color, 32-page brochure features the wide range of miniature sensors, leaded and leadless disks, glass encapsulated thermistors with and without insulation, NTC probes, and SMDs with Ag/Ni/SN termination. Products are classified by applications, complete with key technical data, dimensional drawings, photos and ordering codes. *Information: www.epcos.com.*
