

# **Slide Bushing Has Three Times the Load Capacity**

A high performance series of linear precision bearings is available in both inch (3/16 to 1 bore) and metric sizes (10 mm to 25 mm bore). A new standard in linear motion, the high performance slide bushing has three times the load capacity and is capable of providing up to 27 times the normal travel life of a conventional slide bushing. Other features include self-aligning capability, floating integral wiper seal, clearance adjustable, and cost effectiveness. In addition to its line of linear bearings, the company also carries a wide assortment of precision bearings; ball, linear-rotary, bronze, and needle roller, in metric and inch sizes, with tolerances including ABEC-1, -3, and -7.
