

# IP67 Rated Circular Connectors Lock in Place

The Smartclick connector line has expanded, as the XS5M panel-mount plug and XS5P panel-mount socket have been made available. These IP67 rated circular connectors are compatible with screw-on M12 connectors and XS5 Connectors and strengthen circuit connection by locking into place. Assembly time will be reduced significantly, as these connectors eliminate the need for physical labor. Additionally, assemblers will experience less fatigue, and easier “blind mating.” They are shipped with 20 AWG color-coded leads 0.5 meters in length.
