

Bright, Powerful Line of Laser Diodes

These brightness fiber-coupled laser diodes provide over 20 W of reliable output power in a compact size, allowing original equipment manufacturers to lower their cost per watt and increase equipment lifetimes. Key features include high brightness from a 100 micron fiber at 0.11 numerical aperture, 60% or greater in-fiber power efficiency from electrical to optical, expanded wavelength at 9XX nanometers, and small and efficient packaging.
