

## **Broadband 2 GHz to 6 GHz Matched 4 Watt Power Amplifiers in a Surface Mount Package**

Product produces up to four watts of output power and is internally matched for 2,000 to 6,000 MHz. These amplifiers feature a new surface mount package with an optional high performance heatsink. The amps do not require external circuitry, only a DC power supply and a good ground. They feature internal blocking caps, biasing circuitry, and RF matching. The new packaging is also cost-effective and lightweight.
