

Patchcord Connects M8 Connectors

This M8 to M8 dual patchcord has one male and two female M8 connectors and is used to make the connection between a female and two male M8 connectors in an industrial network. The male M8 connector has four contacts that connect to three contacts in each of the female connectors. The PUR-jacketed cable comes in standard lengths of 0.3 m, 0.6 m, and 1.0 m. When properly mated, the connections meet IP67 ratings. An industry-standard M8 threaded locking system assures reliable operations in harsh environments,
