

Sealed Right Angle Tactile Switches Provide Flexibility in Your Application

The TL6190 is a right angle sealed tactile switch featuring reliable dome technology and a strong tactile force. This process-sealed switch has multiple operating forces and a life expectancy of over 100,000 cycles. The switch has a nylon housing with a stainless steel cover and comes with a silicone rubber actuator. Specifications include an operating force of 220 ± 60 gf, a contact rating of 50 mA @ 12 VDC, a contact resistance of 100 milliohms max initial, and an insulation resistance of 100 Megaohms. It also has an operating temperature of -40°C to 85°C.
