

Twin Blade Rotary Wire Stripper and Twister Designed for Production

Model C300 Twin Blade Rotary Wire Stripper and Twister will strip insulations from solid and stranded wires. The unit is capable of processing Teflon, P.T.F.E., PVC, nylon, rubber, KEL-F, miniature coax, coaxial cables, shielded wires and cables. The slug may be left on the wire and removed later when terminated. The stripping head incorporates a pair of accurately adjustable tungsten carbide stripping blades. The blades are easily adjusted and remain on center. By reversing the belt, the unit may be operated with either clockwise or counterclockwise rotation.
