

## **GreenData Site Launched/Company Offers Free BOM Scrub**

GreenSoft Technology Inc., a leading provider of environmental compliance content management tools and services for the global electronics industry, has launched GreenData, a searchable database of environmental compliance and component information. Greensoft also announced that it would offer free BOM scrubs, as a demonstration of the depth of its database. Companies are encouraged to send in a parts list and GreenSoft will return a match percentage of environmental compliance data against the scrubbed BOM. *Information: [www.greensofttech.com](http://www.greensofttech.com).*
