

Guide Provides Overview of Motor Feedback Systems

The Guide to Motor Feedback Systems for Electric Drives from Sick Stegmann Inc. provides an overview of the company's motor feedback systems for high precision speed and position measurement. Users will find all features and relevant technical information on incremental encoders for asynchronous motors, DiCoder motor feedback systems for synchronous motors, SinCos motor feedback systems for synchronous motors with Hiperface Interface, stand-alone versions with Hiperface Interface, as well as length measuring systems LinCoder. *Information:* www.stegmann.com.
