

## **10,000+ DC-DC Solutions Provided for the Lower Power Range**

More than 10,000 DC-DC solutions in the lower power range (below 60 Watts) are offered. The parts are pin compatible with many popular designs to offer a high-quality drop-in replacement solution for engineers. The DC-DC solutions feature high efficiency, continuous short circuit protection (even for unregulated parts), ultra-micro-sized parts with same pinning, high isolation, RoHS compliance, technical support and documentation, and short lead times (approx. four weeks).
