

Bar Code Label Printer Offers 1,200 Dots per Inch Printing

The LX200 Label Printer utilizes the latest in monochrome high-speed inkjet printing technology. With 1,200 dpi print resolution, the printer has almost six times as many dots per inch as most thermal transfer bar code printers. It prints onto labels, tickets, tags, and coupons for a wide range of applications, including those in which higher levels of security, confidentiality, and durability are required.
