

Molded Rubber And Plastic Components Website

Minnesota Rubber and Plastics (MR&P) has redesigned its website, which communicates the company's science-based approach comprising product design, manufacturing, process development, sourcing, quality systems, material sciences expertise, and program management. The site highlights MR&P's many project solutions and case studies with interesting streaming video. Also, a design guide to assist in developing molding solutions is offered along with a glossary of molding terms. *Information:* www.mnrubber.com [1].
