

# **Parylene Conformal Coating Services Provided**

PTC provides Parylene conformal coating services, automated vacuum deposition systems, and raw materials (dimer). Parylene dimer (di-para-xylylene) is deposited for ultra-thin conformal, pin-hole free, and hydrophobic surface protection of static and fixtured substrates. Benefits include enhanced lubricity, excellent moisture/chemical barrier, electrical insulation, biocompatibility, optical clarity, and high mechanical strength. Engineering/sample runs and a full range of Parylene conformal coating services are offered. ISO 9001:2000, AS9100, IPC-CC-830B, and MIL-I-46058C certified; RoHS compliant.
