

# Precision Linear Motion Devices Guide

HaydonKerk Motion Solutions, a manufacturer of linear motion products, offers a new product catalog and design guide. This is the first comprehensive listing of the complete range of motion products offered by the company since the companies Haydon Switch and Instrument and Kerk Motion Products joined brands in May 2008. The 190-page catalog illustrates a wide range of linear motion products that can be used for different levels of precision motion assemblies, depending on a customer's application needs. *Information:* [www.haydonkerk.com](http://www.haydonkerk.com) [1].
