Sheet Available in Lower Gloss Finish

The Kydex FST sheet is available in a lower gloss finish, integrally colored metallic, with a texture called PB-Brushed Metal, or as an injection-molding resin. This sheet also contains Microban antimicrobial protection built into the sheet so it won't wash or wear away and lasts for the lifetime of the sheet/product. Microban technology helps keep the surface cleaner between cleanings and inhibits the growth of bacteria that can cause stains, odors, and product deterioration.
