

Compressor Designed for Applications Requiring Small, Lightweight Systems

Featuring a small footprint and low sound levels, this lightweight compressor is ideal for medical applications or any pressure application requiring a small, quiet, lightweight pump. It also features a patented monolithic head that reduces leak paths, optional intake locations on the side and bottom for increased ease of plumbing, a patented boltless construction to reduce vibration, and noise and center-line of gravity mounting options for ease of installation. Maximum flow for compressors (115 V/60 Hz) is 3.0 CFM, and maximum pressure is 30 PSIG. 50 Hz is available as 230/50 AUU.
