

Testing Defibrillation-Proof Circuits of Medical Products Simplified

The MegaPulse Defib-5 is a simple, fast, easy-to-use tester designed to test defibrillation-proof circuits of medical products as required by the IEC. It has been updated to the requirements of IEC 60601-1:2005, EC-13, and others. The product saves manufacturers money and time by allowing them to test their equipment before it is sent to the safety agency. Customized MegaPulse Defib-5 solutions can be created for any manufacturer seeking ways to cut down on costs, while ensuring they are meeting worldwide safety agency requirements.
