

Complete Range of Testing Services

Geneva Laboratories offers a full range of testing services to the medical device and pharmaceutical manufacturing industries. For over 35 years, the company provides clients with the respect they deserve and offers testing to meet customers' needs in the areas of microbiology, chemistry, toxicology/biocompatibility, and stability/accelerated aging. Geneva Labs strives to maintain and continually improve their ability to meet these needs. FDA registration and third party certification to ISO 9001 and ISO 17025 assures full cGMP/cGLP compliance. From lot release testing to ISO 10993 biocompatibility, the company provides quality testing and quality customer service, all quality priced at an affordable level. MD&M Minneapolis Booth 859
