

Braid Termination Technology for MI Diagnostic and Therapeutic Delivery Devices

Creganna-Tactx Medical offers the braid advantage—unique braid termination technology. The company is a leading provider of braided shafts for MI diagnostic and therapeutic delivery devices. Creganna-Tactx Medical has over 25 years experience in the design, development, and manufacture of braided shafts. Portfolio products include braided shafts and assemblies for AF ablation catheters, steerable sheaths, neurovascular micro catheters, stent delivery, and heart valve delivery applications. Customers avail of the most advanced braid technologies as part of its service including its exclusive braid terminating technology that delivers a clean, consistent braid termination point with no splaying of wire ends.
