

Constant Current 48 Watt LED Power Supply

Astrodyne Corporation, a leader in standard and modified standard power solutions, announces the release of the OLP48 Series, a 48 watt constant current LED power supply. The OLP48 is a single output, open frame module with output voltages of 12, 24, or 48VDC and features a universal input of 90-264VAC, adjustable OCP level and a built-in active PFC function with $\eta > 0.9$ @ 100-230VAC.

The OLP48 was designed to meet the LED industry's rapidly growing needs by creating a high reliability power supply that meets UL8750 the Standard for Safety of Light Emitting Diode (LED) Equipment for Use in Lighting Products and EN61000-3-2 Class C harmonic current emissions standards. Astrodyne specifically designed a constant current LED power supply to maintain LED brightness even in undesirable environmental conditions for optimum output.
