

Custom Injection Molding, Dip Molding and Extrusion

Caplugs' medical molding capabilities include custom injection molding, dip molding and Extrusion of a wide range of medical & FDA grade materials. Our Class 8 clean-room and customized poly-bagging ensure parts maintain their integrity from our door to yours. Choose from thousands of standard items or have Caplugs build a custom part specific to your needs. Caplugs has provided the medical industry with custom solutions ranging from device components, instrument protection and packaging, to functional products such as nasal cannulas and Y-connectors. Rapid prototyping, free samples of standard parts and over 400 million parts in inventory means your product gets to market fast. MD&M East Booth 2339
