

## **Standard Catheter Balloon Program With Large Inventory of Market-Ready Balloons**

Interface Catheter Solutions has extensive experience in producing medical balloons to customer specifications for a wide variety of clinical applications. Interface now offers an expansive online balloon catalog for ordering PTCA (percutaneous transluminal coronary angioplasty) and PTA (percutaneous transluminal angioplasty) balloons with a quick turnaround. The catheter balloons can also be used for research and development and production purposes for a variety of medical applications.

The standard balloon catalog is made up of market competitive material, sizes and specifications. Customers can expect market leading, tight tolerance and defect-free balloons. Individual balloon specifications are provided online and additional sizes will be added on an ongoing basis.
