

Online Product Selectors from Omron STI

Omron Scientific Technologies Inc. introduces Catalog Navigator—an online product selection tool for industrial machine safety products. Users simply enter a few key application parameters, and the product selector identifies specific part number(s) and provides immediate access to downloadable 2D and 3D CAD files, sales drawings, data sheets, and more. Users can also find lead time information, and request a quote.

Product selectors are currently available for safety light curtains, perimeter access guards, safety laser scanners, safety mats, safety interlock switches, safety systems and safety monitoring relays, and programmable safety controllers.

For more information contact Omron Scientific Technologies Inc. at 6550 Dumbarton Circle, Fremont, CA 94555, call 1-800-479-3658 or 510-608-3400, fax 510-744-1442, email sales@sti.com [1], or visit www.sti.com [2].
