

Advanced High Accuracy Pressure Instrumentation

Heise® precision pressure instruments provide the high accuracy measurements required for critical test, calibration and process applications. The unique blend of product configurations includes the renowned Heise® 0.1% precision dial pressure gauge, the modular PTE-1 handheld calibrator and high accuracy digital pressure indicators and transducers. With ranges from 0.25 Inches of water to 100,000 psi and accuracies to $\pm 0.025\%$ FS, Heise® precision instruments provide reliable, precise readings when measurement certainty is imperative. [For more information about Heise® products, call 800/328-8258 or visit www.heise.com](http://www.heise.com) [1].
