

Full-Service Contract Manufacturer

MICRO is a full-service contract manufacturer of precision components, complete devices, insert/plastic molding and custom fabricated tube assemblies. Includes product development & design assistance—from prototyping and validation to full-scale production. Proven global tubing supply sources, combined with our patented Rolled Tube Technology and automated work cells, allow us to drastically reduce tubing costs on high volume, single-use disposable instruments. Tubing capabilities include: flaring, flanging, expansions & reductions, piercing, slotting, sharpening, electropolishing and laser welding, cutting & marking. Modern facilities are cGMP-QSR compliant and ISO-9001, ISO-13485 & ISO-14001 certified; and MICRO maintains an ISO Class 8 clean room for surgical instrument assemblies.
