

Conformal Coating for Electronics

GERMANTOWN, WI – November, 2011 –

Ellsworth Adhesives and DYMAX Corporation announced today the joint launch of E-MAX 903-E, a new light-cure conformal coating.

E-MAX 903-E will be distributed world-wide exclusively by Ellsworth Adhesives. It has been engineered to cure with UV and visible light using DYMAX's [broad-spectrum and LED curing equipment](#) [1]. The product also features a secondary moisture-cure mechanism for ambient cure in shadowed areas. E-MAX 903-E offers several competitive advantages including high chemical resistance, low viscosity, and a tack-free cure immediately upon cooling after light exposure.

E-MAX 903-E is now available to Ellsworth Adhesives' customers in the product catalog and online in [30 ml syringes](#) [2], [one-liter bottles](#) [3] and [five-gallon cans](#) [4]. The new product compliments Ellsworth Adhesives' broad line of 100% solvent-free products from DYMAX, a leading manufacturer of light curing industrial adhesives and curing systems.

Roger Lee, President of Ellsworth Adhesives – ESR group, commented, "We are excited about the joint launch of E-MAX 903-E with DYMAX Corporation. With exclusive distribution rights, our engineering sales force has become well-versed in the new product, and we are confident that E-MAX 903-E will exceed the requirements of our various customers in the electronics industries."

About Ellsworth Adhesives

Ellsworth Adhesives is the world's largest distributor of adhesive products and equipment. Ellsworth Adhesives is a value added supplier of [adhesives](#) [5], [sealants](#) [6], [coatings](#) [7], [encapsulants](#) [8], [tapes](#) [9], [releases and lubricants](#) [10] from leading international manufacturers including [3M](#) [11], [Bostik](#) [12], [Dow Corning](#) [13], [Dymax](#) [14], [Emerson & Cuming](#) [15], [Fisnar](#) [16], [Loctite](#) [17], [Lord](#) [18],
