

22-mm Panel Mount Audible Alarms

Fitting in a standard 22mm panel hole, 90 new ultra-compact audible alarm models are available for industrial warning applications. These alarms feature three different sound levels: soft (65-75 dB), medium (75-85 dB), & loud (85-95 dB) making these the loudest 22mm alarms on the market. Voltages range from 6 VDC to 120 VAC and six different sound tones are available. The ultra-compact package utilizes finger-proof safe euro-terminal connectors and is a perfect fit for medical applications. Approvals include CUL, NEMA 4X, and IP-66.
