

International Range of Alarms

Transducers USA's Model TRIP-1500L is designed to output in two modes: a single siren sweep generating a minimum of 110 dB and its counterpart, the TRIP 1500 LB(G) generating six internationally recognized alarm sirens for almost every country in the world. The Series is ideal for all types of security intrusions: automotive communication, office equipment theft and other needed alarm situations. The TRIP-1500L series small size of 53 mm diameter X 60 mm height with its sound output level at 110 dB min. makes the TRIP-1500L Series "an attention getter."

The TRIPL Series produces output within a sweep range of from 1.5 to 4KHz. Rated voltage is 12 Vdc within a range of 6 -15 Vdc @ 250mA max. Sealed construction of ABS plastic allows an operating temperature range of -20 to +60°C. Units are furnished with a mounting bracket, color-coded wire leads and is RoHS compliant.

Both the Multi-Tone and Single Sweep siren alerts are available from stock for sample orders, with larger quantities on a six-week delivery basis. Pricing is less than \$7.00 each in lots of 1000 units. Sample requests, detailed specifications and specific pricing and delivery quotes should be addressed to any of Transducers USA's local Representatives or authorized stocking Distributors.
