

## Complex Injection Molded Solutions

The healthcare market demands a dynamic partner with industry experience, innovation, and quality systems you can trust. GW Plastics specializes in complex injection molded solutions and provides concept-to-market contract manufacturing services with a focus on medical/surgical components, assemblies and single-use consumable healthcare products. GW Plastics excels at product development, in-house precision tooling, scientific injection molding, and contract manufacturing with a matrix of competencies geared toward innovative problem solving, Six Sigma quality and speed to market. With standardized ISO 13485 cleanroom manufacturing facilities located in the United States, Mexico, China and Costa Rica, we are never far from our customers.
