

## **Laser Printable Rating Plate Labels for Cast Metal and Textured Painted**

Designed for heavily textured, powder-coated and cast-metal surfaces, the new CILS-9100HD high performance heavy-duty label range provides an immediate, permanent bond to the most difficult surfaces.

Variable data (barcodes, serial numbers etc) can be added in minutes straight from an existing PC and standard Laser or Thermal Transfer printer. The unique CILS-9100HD print receptive surface coating ensures printed data remains sharp, legible and permanent even when exposed to extreme temperatures (-80°C to +388°C), harsh chemicals/solvents, abrasion, oils/fuel etc. Manufactured to any size, shape and full color pre-printed corporate design, CILS-9100HD provides the ultimate labeling solution to the most challenging industrial surfaces.
