550°F Bench Oven

No. 983 is an electrically-heated 550°F (~287.78°C) bench oven from Grieve, currently used for curing medical instruments. 3KW are installed in Incoloy sheathed tubular heating elements. Workspace dimensions are 26" wide x 22" deep x 16" high.

The oven has 3" insulated walls, a Type 304, 2B finish stainless steel interior and a #4 brushed finish stainless steel exterior. Two 13" x 4" access slots are equipped with insulated covers on the rear wall of the oven. An 8" x 10" double-pane Pyrex window is used for viewing the oven chamber. An interior oven light is also provided.

Controls onboard No. 983 include recording and programming temperature controllers and a recirculating blower for this oven.
