

Bimetal Thermometers Eliminate Mercury

Ashcroft® bimetal thermometers are safe and reliable, eliminating the use of mercury to measure temperature. Available in dial diameters from 2 to 5 inches and in ranges from -80 to 1000°F (and Celsius equivalents), these instruments are available in standard stem lengths from 2 ½ through 24 inches and special order stems up to 60 inches. Ashcroft Maxivision® thermometers provide a fixed rear or bottom stem while the Everyangle™ design allows the stem angle to be adjusted. Hermetically sealed for easy wash-down or liquid filled to counter high vibration, Ashcroft® stainless steel bimetal thermometers are ideal for virtually every difficult installation.
