

Adhesive Dispensers for Dual Barrel Cartridges

MDT Staff

A full line of pneumatic bench top adhesive dispensers for standard dual barrel cartridges that eliminates operator fatigue and increases productivity is available from Ashby Cross Company of Newburyport, Massachusetts.

Ashby Cross AC Series Bench-Top Adhesive Dispensers convert standard 50-, 200-, and 400 ml dual barrel cartridges into ergonomic dispensing stations that eliminate operator fatigue from holding a gun and provide increased accuracy, repeatability, and productivity. Mounted on height-adjustable solid steel frames, they feature foot-pedal operation and have a positive shut-off valve at the mixer tip that prevents dripping between applications.

Available in several models including basic shot control, timer controlled shots with 10% repeatability, and linear encoder controlled models which provide volumetric dispensing and 2% repeatability, Ashby Cross AC Series Bench-Top Adhesive Dispensers are designed to match customer requirements. Capable of fractional gram shots to continuous flow, they are suitable for potting, bonding, filling, or any application using dual barrel cartridges.

Ashby Cross AC Series Bench-Top Adhesive Dispensers are priced from \$995.00, depending upon cartridge size and model. Price quotations are available.
