

Laser Optics Cleaning Kit

MDT Staff

The LRO Advanced Optical Cleaning Kit was developed by an optics manufacturer to help users remove splatter and blow-back in the field to optimize the performance of their CO2 lasers. The kit includes complete step-by-step instructions and everything necessary to prevent damage to coatings and help improve transmission, especially in harsh industrial environments.

Capable of extending a laser's working life, the LRO Advanced Optical Cleaning Kit includes 24 cotton balls, 24 surgical-grade finger cots, 24 lens mats, distilled water, polishing compound, reagent-grade isopropyl alcohol and acetone, and an air bulb for dust removal.

The LRO Advanced Optical Cleaning Kit sells for \$39.95.
