

Fully Encapsulated, High-Efficiency AC-DC Power Modules

MDT Staff

Power Sources Unlimited, Inc.

announces the new TML 100C Series of 85–100 Watt power modules that offer an efficiency rating up to 93% and are packaged in a fully encapsulated plastic case with screw terminal block for chassis mounting.

The TML 100C series small footprint, universal AC input of 90–264VAC and DC input 120–370VDC and protection class II qualify these AC-DC power modules as an excellent solution for many space critical applications in commercial or industrial equipment. Additional features include active PFC, power factor >0.95 (230VAC), >0.99 (115VAC), remote On/Off input, LED output indicator, low-leakage current and operating temperature range of -25°C to +70°C without power derating. The TML 100C series is accompanied by an international safety approval package for worldwide markets and EMI meets EN 55022, class B.

Units start under \$90.00 each in OEM quantities. Prototypes are available in 1–2 weeks. All Traco Power products are RoHS compliant and backed by a 3 year warranty.

PSUI is an ISO 9001:2008 North America Authorized Distributor for Traco Power.
