

Fully Regulated 6 Watt DC-DC Converter in SIP8 Package

MDT Staff

Power Sources Unlimited has announced the TMR6 Series of wide input DC-DC converters which offer 6 Watts of power in an ultra-compact SIP8 Package. The TMR-6 Series is an isolated and fully regulated converter product comprised of 36 models covering four 2:1 input voltage ranges (4.5VDC up to 75VDC) and nine output voltages (3.3, 5, 9, 12, 15, 24, ± 5 , ± 12 and ± 15 VDC). Their small size and high efficiency make them an ideal solution for many space critical applications in communication equipment, instrumentation and industrial electronics.

Standard features include an operating temperature range of -40°C to $+65^{\circ}\text{C}$ (without power derating), continuous short-circuit protection, remote on/off control, I/O isolation of 1500VDC and IEC/EN/UL 60950-1 compliance (pending).
